SUMMARY

As someone with two special needs children I understand the importance of accessible web design and the impact it can have on those with different needs. In a world that increasingly depends on technology, I am driven to collaborate on building applications and websites that can help those with disabilities.

SKILLS

FRONT END: **JavaScript, CSS, HTML, UI/UX, Wireframing, Responsive Design, React, Typescript**
TESTING: **Mocha/Chai, Cypress, Test Driven Development (TDD**)
WORKFLOW: **Project management, Git & GitHub**
WORKING ON: **Express**

TECHNICAL PROJECTS

Art-Collector | **Group** | 35 hrs | Repo

Art-Collector is an application that utilized an Art Museum API to display art and allow users to save their favorite ones if they liked them.

Technologies Used: React, Typescript, CSS, Cypress
- As a group we learned Typescript together and implemented it into the project.
- We used React to render all components and made a multiple page application with a homepage, main gallery, and my gallery page.

Travel Tracker | **Solo** | 40 hrs | Repo

An application that allows users to book trips and see their past trips, pending trips, and future trips.

Technologies Used: HTML, CSS, Javascript, Mocha/Chai
- Utilized an API to grab user information and display it and also allow the user to update information such as booking a new trip.

EDUCATION

TURING SCHOOL OF SOFTWARE AND DESIGN

Accredited Front End Software Engineering Certificate   September 2024
- 1500 hours of programming experience over a 7-month intensive, ACCET-accredited software development program

PURDUE GLOBAL UNIVERSITY

B.S. in Information Technology - Programming and Software Development   December 2023
A.S. in Criminal Justice   November 2020

PROFESSIONAL EXPERIENCE
